

Amol Shelke

Aspiring AI/ML Intern — BCA Graduate

amolshelke078@gmail.com | +91-7821815442 | linkedin.com/in/amol-shelke7821 | github.com/Amol-78

Summary

BCA Graduate (2025) and aspiring Machine Learning Engineer with hands-on experience in Python, Machine Learning, Deep Learning, and NLP. Strengthened skills through internships in Data Analytics and ML, developing predictive models and managing data preprocessing workflows. Built projects leveraging NLP and Generative AI within end-to-end machine learning pipelines. Eager to apply technical and problem-solving abilities to contribute to innovative AI solutions as an ML/AI Intern

Education

Qualification	Duration	Score
Bachelor of Computer Applications (BCA)	2022 – 2025	CGPA: 8.5
12th Science	2020 – 2022	74%

Skills

Programming: Python, SQL

AI/ML: Machine Learning, Deep Learning, NLP, Generative AI, LLMs, RAG

Libraries: NumPy, Pandas, Scikit-learn, TensorFlow, Keras, OpenCV

Data Analysis: EDA, Power BI, Excel

Tools: Streamlit, Docker, Git

Work Experience

Data Analytics Intern

Aug 2025 – Sep 2025

TechnoHacks Solutions Pvt. Ltd

Performed data cleaning and transformation using Python (Pandas, NumPy). Developed interactive dashboards using Power BI and Excel. Conducted exploratory data analysis (EDA) to extract actionable insights from real-world datasets.

Machine Learning Intern

Sep 2025 – Oct 2025

Cognifyz Technologies

Built and evaluated machine learning models using end-to-end ML workflows. Performed data preprocessing, feature engineering, and accuracy analysis. Assisted in model deployment and performance optimization.

Projects

Face Attendance System

Developed a real-time face recognition attendance system using OpenCV and Python that performs facial encoding and detection to automatically mark attendance, detects unknown faces, dynamically updates the database, and integrates live webcam streaming for real-time monitoring and processing.

California House Price Prediction

Built an end-to-end regression pipeline using Scikit-learn to predict housing prices, including data preprocessing, feature engineering, and model evaluation, and deployed the application using Docker with support for single-input prediction and batch processing via CSV uploads.

Image Detection Application

Implemented a YOLO-based object detection system deployed with Streamlit that supports image uploads, live webcam detection, and video processing for real-time object detection and bounding box visualization.

Automatic EDA Application

Developed a Streamlit-powered automated exploratory data analysis tool that generates dynamic dashboards, statistical summaries, and visualizations from uploaded datasets to provide instant analytical insights.
